

## NAVIGATING NET ZERO: PRACTICAL SOLUTIONS FOR ASSET OWNERS

Encouragingly, action to combat Climate Change has been promoted to the front page. Especially so in the UK as it prepares to host the high-profile COP26 summit in November. In May '21, landmark legal cases and shareholder action has seen 'Big Oil' face the power of engagement and shareholder action.

Climate Change though, is a fast moving and technical area with Asset Owners, Trustees and Fund Selectors flooded with information and solutions. In this context, it is valuable to take a step back, evaluate investment beliefs and take *practical* steps in portfolios.

**Storebrand Asset Management** will present on equities setting out the dangers of 'closet active' investing in Paris Aligned portfolios.

**Robeco** present on: Investing for the future today: addressing climate considerations in fixed income portfolios

Our panel includes leading investment consultants and asset owners. They will enrich the debate and set out how they advise clients or invest assets to put climate change front and centre of portfolio construction.

### OUR PRESENTERS

**Henrik Wold Nilsen**  
Portfolio Manager  
*Storebrand Asset Management*

**Remmert Koekkoek**  
Head of Insurance and Pensions Solutions  
*Robeco*

**Henrik Wold Nilsen**  
Portfolio Manager

**Henrik Wold Nilsen** joined Storebrand Asset Management in 2010 and is a Senior Portfolio Manager.

Henrik is responsible for the design and ongoing management of Storebrand's flagship climate aware global equity strategy, Storebrand Global ESG Plus. In his role he combines a specialist understanding of climate science, policy and data with many years' experience in portfolio risk management techniques and optimisation.

He has a Masters in theoretical high energy physics from the University of Bergen (2005) and a doctorate in experimental high energy physics from the University of Freiburg, Germany (2009), which was followed by a post-doctoral position in Freiburg in connection with research lab CERN, Geneva (2009-2010)

**Remmert Koekkoek** is Head of Insurance & Pension Solutions within the Global Macro team. In this role he focuses on the management of balance sheet solutions and buy and maintain portfolios for pension funds and insurance companies. He has worked at Robeco since 2011.

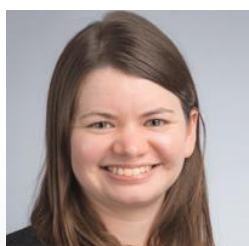

Prior to joining Robeco, he was part of the insurance and pension solutions group of Credit Suisse in the period 2010-2011, where he was responsible for providing hedging and investment solutions to Dutch pension funds and insurance companies. Between 2005 and 2010 Remmert worked at Robeco in the Structured Investment team. He started his career in the industry in 2004 at ING Risk Management. Remmert holds a Master's (cum laude) in Econometrics from Erasmus University Rotterdam.
