

GROWTH FIXED INCOME

In a post-GFC world of monetary stimulus where higher quality investment grade and secure income assets are hoovered-up by well funded entities and insurers, elevated yield in liquid fixed income has been challenging to secure.

Many investors though, from under-funded DB pension schemes to private investors and DC members require higher returns from fixed income. But where can this be found? And how can default risk be managed?

In this Growth Fixed Income Panel we will explore the outlook and flexible methods to deliver return from sub-IG fixed income including high yield, emerging market debt and leveraged loans with the help of leading asset managers' Capital Group and PGIM Fixed Income.

Our expert panel includes Kate Hollis of Willis Towers Watson, Alex Goddard of Mercer and Mark Hedges, ex CIO of Nationwide Pension Fund, and now professional trustee with Capital Cranfield.

Please join us for a great fixed income debate!
