

RENEWABLES: INVESTING FOR UK'S ENERGY TRANSITION

COP26... Just a short 6 months ago, but with all that's happened in the world in the intervening period, it seems like a lifetime ago.

But, the climate crisis remains THE issue the global community faces in the decades to come, and the UK has its part to play. Massive investment and innovation is needed in renewable energy sources, but also to address intermittency challenges and alleviate energy security concerns.

In this panel, we welcome **Will Morgan** of **Alpha Real Capital** and **Rosalind Smith-Maxwell** of **Quinbrook Infrastructure Partners** to explore the landscape, the future energy mix, pricing and the potential for investment returns whilst delivering on the UK's decarbonisation aspirations.

Our panel also includes leading investment consultant, **ISIO** and **London CIV LGPS Pool**

Will Morgan
Head of Renewables

Alpha Real Capital

Will Morgan joined Alpha Real Capital in 2013 and is responsible for the group’s renewables investments. He is fund manager for the Wind Renewables Income Fund with £100 million of capital commitments from UK pension funds.

Will has over 15 years’ investment management experience responsible for institutional, private equity and VC funds, acting for Morley FM, HgCapital, Barclays Infrastructure and Alpha Real Capital during this time.

Prior to joining Alpha Real Capital, he held the position of Finance and Portfolio Director, overseeing 50 operational assets across Europe with 330 MW of installed renewable capacity.

Rosalind Smith-Maxwell has successfully advised on more than 4GW of renewable energy power projects including onshore wind, solar and biomass technologies. Her clean technology expertise includes behind the meter storage and battery manufacture technologies.

Rosalind was a Vice President at Fieldstone Private Capital Group between 2015 and 2020, where she focused on transactions located in Europe and Africa. Prior to joining Fieldstone she was at Climate Change Capital for seven and a half years

She holds a BSc in Genetics from the University of Edinburgh, and was called to the Bar in 2009, after being awarded the Jules Thorn scholarship by Middle Temple.
