

INFRASTRUCTURE IN AN INFLATIONARY WORLD

After an extended period of very low inflation, it is back with a passion and front and centre of the minds of all investors. In this context, Infrastructure, a real asset, offers some very interesting attributes, often-times with cashflows linked to inflation.

In this panel, we welcome expert investors, Rosalind Smith-Maxwell of Quinbrook and Jason Cogley of Fiera Infrastructure to evaluate how they consider, value, underwrite and originate investments in renewables and traditional core infrastructure as inflation becomes increasingly entrenched.

We will also take the opportunity to explore broader market conditions and attributes and how infrastructure might fit in portfolios in a new investment epoch.

Our expert panelists include **Andrew Singh** and **Andrew Jacobson**, both Head of Real Assets research at isio and LCP respectively, and **Mark Hedges**, independent trustee at Capital Cranfield, and Chair of the Investment and Funding Committee at Nationwide Pension Fund.

Managing Director
Fiera Infrastructure

Rosalind Smith-Maxwell
Vice President

Rosalind Smith-Maxwell has successfully advised on more than 4GW of renewable energy power projects including onshore wind, solar and biomass technologies. Her clean technology expertise includes behind the meter storage and battery manufacture technologies.

Rosalind was a Vice President at Fieldstone Private Capital Group between 2015 and 2020, where she focused on transactions located in Europe and Africa. Prior to joining Fieldstone she was at Climate Change Capital for seven and a half years

She holds a BSc in Genetics from the University of Edinburgh, and was called to the Bar in 2009, after being awarded the Jules Thorn scholarship by Middle Temple.

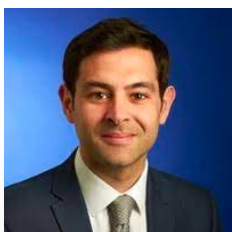

Jason Cogley leads deal origination and execution, and contributes to asset management in Europe. He is based out of Fiera Infrastructure's London office in UK.

Jason has 19 years' infrastructure and investment experience. Since 2014, he had been at the London office of SL Capital, the private markets business of Standard Life. There, he focused on the sourcing, due diligence and monitoring of direct infrastructure investment opportunities. He originated the majority of portfolio company investments for SL Capital Infrastructure I, SL's infrastructure fund. Before joining SL Capital, Jason worked for 15 years in the infrastructure sector, dealing with energy infrastructure, regulated utilities and PPPs with Impax Asset Management, Infrared Capital Partners, Macquarie Infrastructure and Real Assets, as well as PwC. He holds a Bachelor of Commerce degree from Monash University in Australia and is certified as a Chartered Accountant (ICAA).
